

The Italian City

Based in Bologna, this project explores Italian history and culture through the study of four different eras. Travel to 3 other cities to visit museums, historical sites, and more.

This project was transformational because I made connections from around the world, learned about the cities of Italy, and experienced an unfamiliar culture all while making lifelong friends and increasing my confidence in traveling on my own.

Why I selected this project: to experience and learn about a new culture (and to eat some really good food).
